

1. Abstract

GreenEarth Token (GEAR) is a decentralized utility token designed to drive global environmental preservation. By funding eco-friendly businesses, green innovation, and regenerative projects, GEAR serves as both a digital currency and a movement. Every transaction supports real-world sustainability, empowering individuals, companies, and communities to take meaningful climate action through blockchain technology.

2. Mission Statement

To create a greener, more sustainable world by supporting clean technologies, ethical businesses, and regenerative practices—one token at a time.

3. Token Overview

Attribute	Details
Token Name	GreenEarth Token
Ticker	GEAR
Blockchain	Ethereum (ERC-20) or Solana
Total Supply	1,000,000,000 GEAR
Decimals	18
Launch Date	Q2 2025

4. Core Values

-  Sustainability First: Every GEAR token is tied to real-world green action.
-  Innovation-Driven: Supports forward-thinking, eco-conscious startups.

- 🤝 Community Powered: Governance and growth guided by holders.
- 🔍 Transparency: All fund usage traceable on-chain.
- 🌐 Global Impact: Focused on scalable solutions for climate and ecology.

5. Token Utility

- Green Funding: Allocates funds to vetted eco-businesses, carbon offset programs, and green tech.
- Governance: Holders vote on which initiatives receive support.
- Staking Rewards: Earn GEAR by staking and locking in long-term commitment.
- Eco-Market Access: Use GEAR in green e-commerce, NFTs, and community-backed services.
- Impact Badges: Receive blockchain-verified NFT badges for eco-participation.

6. Tokenomics

Category	Allocation	Tokens	Description
Environmental Projects	40%	400,000,000	Donations, seed funding for clean ventures
Public Sale	20%	200,000,000	Community access and liquidity
Team & Founders	15%	150,000,000	Locked and vested over 24 months
Marketing & Awareness	10%	100,000,000	Environmental campaigns and influencer outreach
Staking Rewards	10%	100,000,000	Reward pool for active contributors
Reserve & Ecosystem Fund	5%	50,000,000	Liquidity, grants, and platform evolution

7. Transaction Fee Model

Action Fee % Allocation

Buy/Sell 3% 1.5% Environmental Fund, 1% Ops, 0.5% Burn

Transfers 1% 1% to Eco Reserve

Note: All funds from the Environmental Fund are transparently allocated via DAO votes.

8. Roadmap

Q2 2025 – Genesis

- Token launch, smart contract audit, brand release
- Partner onboarding (eco orgs, green businesses)

Q3 2025 – Activation

- First round of green project funding
- Launch of staking and NFT badge system
- Listing on DEXs and eco-market integrations

Q4 2025 – Expansion

- Global partnerships with sustainability orgs
- Governance voting launch (DAO model)
- Educational platform and community rewards

Q1 2026 – Impact Scaling

- ESG tracking dashboard
 - GreenEarth Grants Fund launch
 - Cross-chain expansion and multichain bridge
-

9. Governance

GEAR is governed by its community. Token holders can propose and vote on:

- Which businesses or projects receive funding

- Adjustments to tokenomics or fees
 - New sustainability initiatives or partnerships
- Governance is executed through an on-chain decentralized voting system.
-

10. Security & Audit

- Fully audited smart contracts
 - DAO-controlled treasury via multi-sig wallets
 - Public transparency dashboards for fund tracking
-

11. Partnership Ecosystem

- Sustainable startups & ethical brands
 - ReFi (Regenerative Finance) protocols
 - NGOs, carbon offset networks, green marketplaces
 - ESG reporting tools and platforms
-

12. Legal & Compliance

- GEAR is a utility token used for participation in green initiatives
 - Compliance with applicable global crypto and charity laws
 - Eco-funding partners vetted through due diligence processes
-

13. Conclusion

GreenEarth Token (GEAR) represents a fusion of purpose and technology. In a time where environmental action is critical, GEAR empowers individuals and businesses to support a greener world directly through decentralized, transparent systems. It's time to shift the world into green gear—join the movement.
